Your project description.

Getting Started

1.1 Example of Usage

Example:

```
import os
from py_social.facebook_services import *

TEST_FB_APP_ID = os.getenv('FACEBOOK_API_KEY', '?')
TEST_FB_APP_SECRET = os.getenv('FACEBOOK_API_SECRET', '?')
user_id = '?'
page_id = '?'
event_id = '?'
group_id = '?'

fb = FacebookUser(user_id, app_id=TEST_FB_APP_ID, app_secret=TEST_FB_APP_SECRET)
fb.load(fields='email,username')
print(fb.get_email())
print(fb.get_field('username'))

fb = FacebookPage(page_id, app_id=TEST_FB_APP_ID, app_secret=TEST_FB_APP_SECRET)
fb.load()
fb.load_feed()
print(len(fb.get_all_users_ids()))
print(len(fb.get_events_ids_from_feed()))

fb = FacebookEvent(event_id, app_id=TEST_FB_APP_ID, app_secret=TEST_FB_APP_SECRET)
fb.load()
fb.load_feed()
fb.load_maybe()
fb.load_attending()
fb.load_small_flyer()
fb.load_flyers()
print(len(fb.get_all_users_ids()))
print(len(fb.get_events_ids_from_feed()))

fb = FacebookGroup(group_id, app_id=TEST_FB_APP_ID, app_secret=TEST_FB_APP_SECRET)
fb.load()
fb.load_feed()
fb.load_members()
print(len(fb.get_all_users_ids()))
print(len(fb.get_events_ids_from_feed()))
```

```
# To load all feed:  
while fb.has_feed_to_load():  
    fb.load_feed()  
  
# or  
fb.load_feed(pages=10)
```

1.2 Section 2

1.2.1 SubSection 2.1

In file.py:

```
Settings = False
```

About

2.1 Change Log

Date format: yyyy/mm/dd

- [new] FacebookGroupPage.
- [new] FacebookUserInfo.
- [new] tweet.

2.2 Collaborators

Paulo Cheque <<http://twitter.com/paulocheque>> <<https://github.com/paulocheque>>

2.3 Pull Requests tips

2.3.1 About commit messages

- Messages in english only
- All messages have to follow the pattern: “[TAG] message”
- TAG have to be one of the following: new, update, bugfix, delete, refactoring, config, log, doc, mergefix

2.3.2 About the code

- One change (new feature, update, refactoring, bugfix etc) by commit
- All bugfix must have a test simulating the bug
- All commit must have 100% of test coverage

2.3.3 Running tests

Command:

```
python manage.py test --with-coverage --cover-inclusive --cover-html --cover-package=your_package.*
```

2.4 TODO list

2.4.1 Tests and Bugfixes

-

2.4.2 Features

-

2.4.3 Documentation

-

Indices and tables

- *genindex*
